

FlexiRay™ SFR

Rugged Slim RFID UHF Antenna

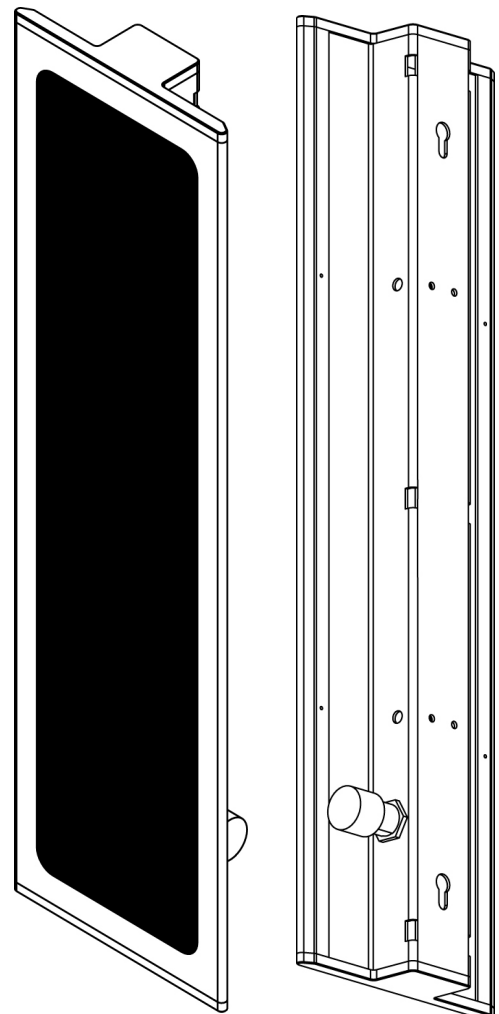

Key Features

- Aesthetic design suitable to entrances or passages
- Unique radiation pattern
- Modular antenna length
- Low mounting depth
- Rugged all-metal construction
- Conveyor RFID antenna

Modular slim planar antenna **FlexiRay™ SFR** with unique radiation pattern enabling creation of RFID reading zones in entrances, doors, conveyor belts or production lines. The antenna is supplied in various lengths from 460 to 1090 mm, thus allowing optimal adaptation to specific installation. Rugged all-metal construction was developed for use in demanding industrial conditions.

Antenna **FlexiRay™ SFR** provides flexible mounting capability. The design allows deployment not only in industrial environments but also in interiors and offices. Antenna has circular polarization and is also available for FCC and ETSI frequencies. Antennas are equipped with robust N-type connector for flexible cable connection.

Antenna with gain 0 dBi was designed for **short range applications requiring reading characteristics along the whole antenna length**. Using max. EIRP 2W it can achieve reading distance from 2 to 4 metres, depending on the type of antenna, used reader, cable length, used RFID tags and environment.
