

FlexiRay™ SF

Ultra Slim RFID UHF Antenna

Key Features

- Esthetic design suitable to entrances or passages
- Modular antenna length
- Low mounting depth
- Unique radiation pattern

Modular ultra-slim planar antenna **FlexiRay™ SF** with unique radiation pattern enabling creation of RFID reading zones in entrances or doors. The antenna allows completely invisible installation into door-frame for installation of RFID gateways in interiors. It is supplied in various lengths from 410 to 1025 mm, thus allowing optimal adaptation to specific installation. The antenna thickness is only 2 mm.

Antenna **FlexiRay™ SF** provides flexible mounting capability by using glue or screws. Antenna has circular polarization and is also available for FCC and ETSI frequencies. Antenna is equipped with SMA connector.

Antenna with gain 0 dBi was designed **for short range applications requiring reading characteristics along the whole antenna length**. Using max. EIRP 2W it can achieve reading distance from 2 to 4 metres, depending on the type of antenna, used reader, cable length, used RFID tags and environment.
